

PRESS RELEASE

combit List & Label Supports Microsoft Visual Studio 2015

combit List & Label Supports Microsoft Visual Studio 2015

Konstanz – 07/22/2015 combit's award-winning List & Label reporting tool is moving forward: Right at its debut, combit List & Label will support the newly released Visual Studio 2015. As a member of the Visual Studio Industry Partner program, combit's components, controls and plug-ins for Visual Studio 2015 are already compatible with the most recent version as soon as it launches. Consequently, these components enable developers and developer teams worldwide to immediately take advantage of the latest Microsoft technologies. The integration of List & Label with Visual Studio allows users to seamlessly expand their own applications with professional reporting features.

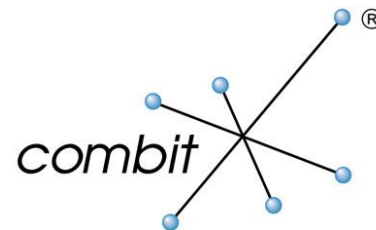

"We congratulate Microsoft on the release of Visual Studio 2015 and are proud to once again be part of the Sim-Ship Partner circle. Visual Studio 2015 has set new standards. Our cooperation with Microsoft facilitates smooth integration of List & Label with Visual Studio 2015, so developers can create diverse applications with effective reporting features," explains Jochen Bartlau, combit's Managing Director and Head of Development List & Label.

"We are happy to see combit update its List & Label product with the release of Visual Studio 2015, showing their continued support for Microsoft's latest developer tools," said Mitra Azizrad, General Manager, Developer Tools Marketing and Sales, Microsoft Corp. "combit's List & Label compatibility with Visual Studio 2015 gives developers access to impressive and detailed reporting capabilities."

List & Label Product Description

Thousands of developer teams and millions of end users around the world have been using the award-winning List & Label report generator since 1992. Software developers are not only able to expand their applications with high-performance reporting features, but also have access to every type of information processing and information exchange in classic applications, as well as in the form of web reporting or even in the cloud. When compared to other reporting tools, List & Label offers the greatest flexibility in terms of readable data types, the programming languages supported, and the number of export and barcode formats. List & Label's Designer is available in many languages and be integrated into applications without licensing costs, which allows even end users to create their own reports.
